

CARPET WASHING MACHINES

FULL MODEL AUTOMATIC CARPET WASHING MACHINE

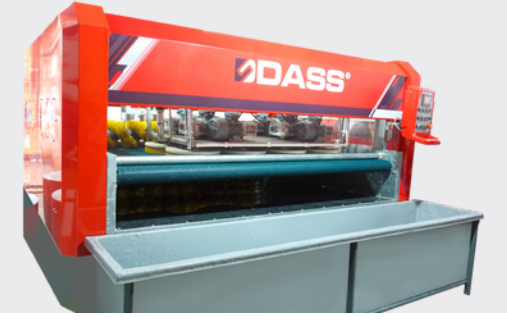

It is an ideal product for those who want to do professional carpet washing. ♦ Full series are produced with 260, 320 and 420cm bandwidth options. It has automatic control panel. ♦ With its cylinder brush feature, it offers more effective cleaning with more circular brushes. Table type automatic carpet washing machines provide extra capacity for carpet washing companies and save labour, water, electricity and time.

Technical Specifications

PARAMETER	VALUE
VOLTAGE	380V / 50-60 Hz
TOTAL POWER	19.2 kW
NUMBER OF BRUSHES	10 Disc Brushes, 2 Cylinder Brushes
CONTROL SYSTEM / CONTROL PANEL	PLC Control / Touchscreen and Button Panel
BRUSH SPEED	140 RPM
BELT SPEED	3-5 m/min
WASHING CAPACITY	250-350 m ² /hour
WASHING WIDTH	4200 mm
BOTTOM WASHING FEATURE	Available
RINSING FEATURE	Available
CARPET ROLLING	Available
PRESSURE SCRAPER (BLADE)	Available
DIMENSIONS	4700 * 2500 * 2000 mm
WEIGHT	2150 kg

Featured Usage Details

- ◊ Paslanmazlık garantili ve 4 mm+ thick carrier body.
- ◊ Industrial strength and compact design.
- ◊ Polyethylene carpet resting pool.
- ◊ Does not require physical strength.

- Rinse cycle system. Under carpet washing feature. Waste water collection pool under the washing section
- ◊ Rolls the carpet at the exit.

- Brush pressure adjustment according to carpet thickness. Production with desired number of brushes.
- ◊ Washing speed adjustment according to carpet dirt condition. Automatic detergent and water supply.

- ◊ Digital touch screen.
- ◊ In case of electronic malfunction, it writes where the problem is on the screen.

CARPET WASHING MACHINES

AMORTISER SPINNING MACHINE

Quiet and smooth operation. Stainless 304 chrome 1st quality steel drum. 3 mm steel drum thickness. Easy squeezing of carpets without damaging them. Polyemide cover technology that prevents drum and cover wear. External electrical panel with time setting, independent from the machine, ensuring work safety. ♦ 95% carpet drying is achieved in max. 1.5 minutes with real 1200 rpm. Balancing process performed on CNC machines

zero-balanced carpet extractors manufactured with. ♦ Carpet extractors in different sizes show high resistance in case of not opening the carpet with its net weight. ♦ Possibility of rinsing during the carpet spinning process. ♦ Perfect result on long runners and thick carpets with large drum diameter.

Technical Specifications

PARAMETER	VALUE
VOLTAGE	380V
FREQUENCY	50-60 Hz
MOTOR POWER	7.5 kW
MOTOR SPEED	1400 RPM
ROLLER SPEED	1200 RPM
INNER DRUM LENGTH	4200 mm
INNER DRUM DIAMETER	400 mm
CHROME THICKNESS	3 mm
HOLE DIAMETER	1.5 mm
CARPET SPINNING CAPACITY	300 m ²
SPINNING TIME	2 min
WEIGHT	810 kg
DIMENSIONS	1100 * 4700 * 1550 mm

CARPET WASHING MACHINES

CARPET FLUFFING AND CARPET PACKAGING MACHINE

◇ Carpet pile removal machine is an industrial cleaning machine that will make a great contribution to businesses that want to professionalise in the carpet washing sector.

◇ The machine, which can pull the pile out of the carpet before or after the carpets are washed, also softens the pile of the carpet by combing it.

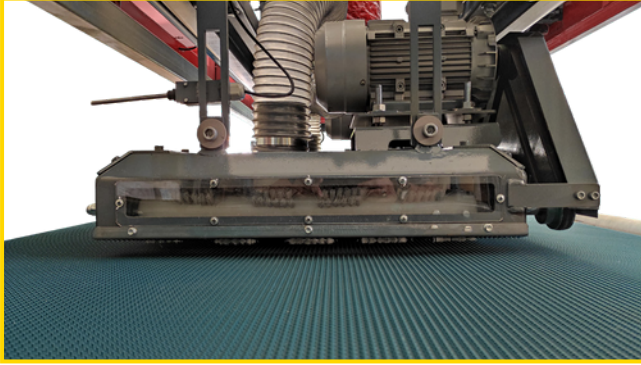

It is a machine that you can do carpet packaging work professionally. There will be no need for the counters where the carpets in the enterprises are controlled.

Technical Specifications

VOLTAGE	380V
FREQUENCY	50-60 Hz
BELT MOTOR POWER	0.75 KW
SUCTION UNIT MOTOR POWER	1.1 KW
TOTAL UNIT MOTOR POWER	5.5 KW
BRUSH MOTOR POWER	0.75 KW
BELT SPEED	8.5 M/MIN
SHAFT ROTATION SPEED	140 RPM
CLEANING CAPACITY	4200 M ² /HOUR
TOTAL CLEANING CAPACITY	180-250 M ² /HOUR
DUST BAG CAPACITY	80 LT
VOLUME CAPACITY	1720 * 450 * 1900 MM

Featured Usage Details

Full Performance Forging System

Speed Adjustable Conveyor Belt

Features

DASS DUSTER CARPET DUSTING MACHINE, With the help of rapidly rotating brushes, it collects the pile and hairs remaining on the carpet surface and prevents the airing of the pile and odour formation by fluffing the hairs. Thanks to the carpet pile removal and packaging machine, you can easily and effortlessly perform the last control, surface stain control, packaging and perfuming process on dry and previously washed carpets. Thanks to the illumination on the machine, stains on the carpet surface can be seen more easily. Thanks to this opportunity, the working personnel works much more effectively and quickly in stain control.

CARPET WASHING MACHINES

CARPET BEATER AND DUSTING MACHINE

Carpet beating - dusting machine is the first stage of the carpet washing system. There is an average of 50-100 grams of dust in a carpet taken into operation. These dusts are generally located at the bottom of the carpet, so the cost and duration of washing increases. Even if the carpets are washed, the dust is still there after washing. It is only possible to overcome this situation by removing dust from the carpet before washing. Carpet dust beating machines automatically beat the carpets and remove the dust as soon as possible. Carpets are washed more quickly and much more easily. With one personnel, 300 m2 to 500 m2 of carpet dust can be removed per hour. It is very economical and has an energy consumption of only 3 to 4 Kw in 1 hour. It takes your business one step further than other firms.
